Details

This program is an intermediate course pertaining to electronic fetal monitoring (EFM). Participants should have a basic understanding of EFM prior to attending. Completing this program will give the experienced health professional the ability to identify principles and concepts related to the interpretation of EFM tracings.

Program Objectives:

- Describe the steps of interpreting the fetal monitor tracing and NICHD terminology
- Identify the difference between intermittent auscultation and intermittent fetal monitoring
- Identify possible physiological basis of fetal monitoring tracings
- Interpret fetal arterial cord blood gasses
- Interpret and consider possible management techniques of fetal heart rate patterns within the realm of electronic fetal monitoring
